

PRISMJET™ 100 Series

- 3.0 mil PVC overlaminate film with an optically clear permanent acrylic adhesive on smooth paper liner
- Superior clarity for enhanced image quality of laminated prints
- Protects digital prints from abrasion and UV exposure for up to three years outdoors.
- Available in matte, lustre, and gloss finishes.

PROPERTIES

• Face Stock

3 mil clear PVC calendared film. Light transmission, approximately 87%.

• Adhesive

0.8 to 1 mil optically clear permanent, pressure-sensitive acrylic adhesive. Adhesion to stainless steel measured at 48 oz/in.

• Liner

4.0 mil smooth paper liner

• Applications

Protection of digitally printed graphics from moisture, UV exposure, abrasion, dirt and detergents.

• Temperature Ranges

Minimum application: 40°F
Service temperature range:
-40°F to +180 F

• Shelf Life

One year @ 70°F, 50% RH

• Available Sizes

54" x 150 ft rolls

PrismJET Overlaminating Film is a pressure sensitive 3-mil PVC film with the optically clear 200-4990 permanent acrylic adhesive on a smooth paper liner. This vinyl film offers protection for digitally printed inkjet and thermal resin graphics from UV exposure, abrasion, moisture and other environmental exposures. PrismJET 100 Series films are recommended for use with cold pressure lamination tools and machines without the addition of heat. The films are available in three finishes with the following gloss ratings:

- PrismJET 100 Gloss:
60° Gardner Gloss level: Initial > 80
- PrismJET 101 Lustre:
60° Gardner Gloss level: Initial 40-60
- PrismJET 102 Matte:
60° Gardner Gloss level: Initial 15 maximum
